LMC is an independent economic consultancy comprising two companies:

**LMC INTERNATIONAL** serves the global agribusiness sector and its downstream food, fuel and chemical industries. LMCI delivers market analysis and supply, demand, price, trade and policy forecasts.

**LMC AUTOMOTIVE** provides market intelligence to vehicle and component manufacturers as well as financial, logistical and government institutions.

LMC clients include BMW, BP, Ford, EU Commission, Jaguar, P&G, Kraft, Tate & Lyle, United Nations and PepsiCo.

Whilst many LMC employees stay for years, former employees now hold prominent positions with the World Bank, IMF, Volvo, Mercedes-Benz, Bosch, Oxford University, the UK Treasury, Credit Suisse and Unilever.

*If you were working at LMC,  
last week you might have...*

- Presented your project on Brazilian sugarcane demand to clients in Thailand
- Discussed research strategy with colleagues in New York, Bangkok and Munich
- Scored a goal for the LMC football team
- Collated and considered data to decipher crude oil price volatility
- Interviewed Coca Cola's Purchasing Manager about their sustainability strategy
- Talked over your progress and planned your career's next step

LMC

Careers in Economic & Business Consultancy

## Accelerate your career in market analysis & forecasting at LMC

### What you will gain as a LMC Research Analyst

Furthering your career at LMC will challenge you intellectually while rewarding you with the opportunity to shape industry decisions and government policies. LMC experts are globally respected and you will support their expertise by delivering data and written analysis while developing your own knowledge base.

### What you will bring to the role

We want intellectual curiosity mixed with analytical rigour. You will have a degree in economics or other numerate subject and experience of data management, including modelling. Strong communication skills and the ability to be both a self-starter and team player are essential.

### In your first LMC role you will

- Collate data; carry out analysis; forecast supply, demand and price
- Support in the creation of syndicated reports, datasets and slide decks as well as bespoke consulting projects
- Apply your analytical skills to address client queries and requests
- Interact regularly with LMC directors, experts and industry contacts globally
